

Methyl 3-Methylthiopropionate, Natural
Natural Advantage, LLC
www.natadv.com

Natural Advantage introduces **Natural Methyl 3-Methylthiopropionate (FEMA 2720; CAS 13532-18-8)**. Occurring naturally in pineapple and wine, we like to refer to this product as the “jack of all trades” because it is so versatile. At high concentrations, this material can give onion and garlic flavors; nonetheless, at lower dilutions it tastes like cooked pineapple. This product can also be used to enhance sweetness; it can make 5% sugar water tastes like 7.5% sugar water at 5ppm.

EU and US Natural, Kosher, Non-GMO, Vegetarian
