

**Esifurane, Natural**  
**Natural Advantage, LLC**  
www.natadv.com

Natural Esifurane, also known as **4-Ethoxy-2,5-Dimethyl-3(2H)Furanone (FEMA 4104, CAS 65330-49-6)** is more sugar-like than Strawberry Furanone or Mesifurane. It enhances both sweet and savory as well as amplifies sweeteners. Esifurane works best with other sweeteners to improve sugar likeness. It can be described as sweet, fruity, and caramellic, with berry notes. Esifurane has also been described as having the aroma of a bowl of sugar. It has superior oxidative stability in spray-dried formulas. Esifurane occurs naturally in coffee, grape, strawberry and other fruits.

Flavor use level : 0.1 to 1 ppm in finished goods.

*EU and US Natural, Kosher, Non-GMO, Vegetarian*
