

Natural Advantage introduces **Natural Ethyl Butyrate ex Orange (FEMA 2427, CAS 105-54-4)**. This material occurs naturally in apples, bananas and orange juice. With a strong diffusive fruity odor reminiscent of pineapple and bananas, this product works well in fruity, berry and juicy flavors. The sweet, fresh squeezed taste of Ethyl Butyrate makes it a desirable natural product to use in juice blends, specifically orange juice. With this ingredient, you can be sure to keep your products natural and your labels clean. Recommended use level: 0.001-1ppm.

EU and US Natural, Kosher, Non-GMO.
